

Overcoming The Prominent Obstacles Getting In The Way Of Corporate AI Transformation

A Six-Part Webinar Series for Digital Transformation Leaders

Join us for a comprehensive six-part webinar series designed to provide digital transformation leaders with actionable strategies and practical initiatives to navigate and overcome key challenges in AI adoption, fostering a successful and responsible AI transformation.

Each 45-minute webinar provides:

- Insight into why the specific obstacle exists and its impact on AI transformation.
- Practical and actionable steps to overcome the obstacle.
- An opportunity to ask questions and gain further insights.

Webinar 1

The Lack of Structure

Discover the importance of a structured framework for AI transformation, the overall ethos required, and the five prominent obstacles all corporates face in AI transformation.

Webinar 2

Cultural Resistance to AI

Explore why cultural resistance to AI exists and how it impacts AI initiatives, and gain insights on fostering a culture that supports AI-driven change and innovation.

Webinar 3

Responsible AI Transformation

Explore the governance and ethical challenges blocking AI implementation, understand why these challenges arise and learn about initiatives to help you Sharad Event 2 overcome them.

Webinar 4

Addressing Integration Issues

Explore the technical and strategic considerations for integrating AI into your existing workflows, discuss common integration challenges, and find out how to overcome them.

Webinar 5

Aligning AI with Corporate Strategy

Explore how to align AI initiatives with your corporate strategy, discuss common pitfalls, understand why they happen, and ensure proper resource allocation for AI projects.

Webinar 6

Developing an AI-Ready Workforce

Explore the people dimension of AI transformation, discuss the skills gap and training needs, understand why these challenges exist, and learn how to cultivate an AI-empowered workforce.
